

RC FLYING!

AN EDUCATIONAL AND FUN FAMILY HOBBY

RC flying can be enjoyed by all family members regardless of age. Flying RC teaches hand eye coordination, mechanics, design, electronics and is it great fun rather like a real world video game. Many youngsters go on to make a career in aviation. The only limitation is ones imagination.

Models can be constructed from scratch, or if preferred partially or even fully built. They can range from simple small foam ones to large fully detailed scale models of actual aircraft and even helicopters. Power may be gas, glow, electric, turbine or un-powered gliders.

There are many clubs in the area who are always willing to answer questions and help anyone interested in the hobby. These clubs have volunteer instructors who give their time to get a new pilot in the air.
